

Bathyscafocus

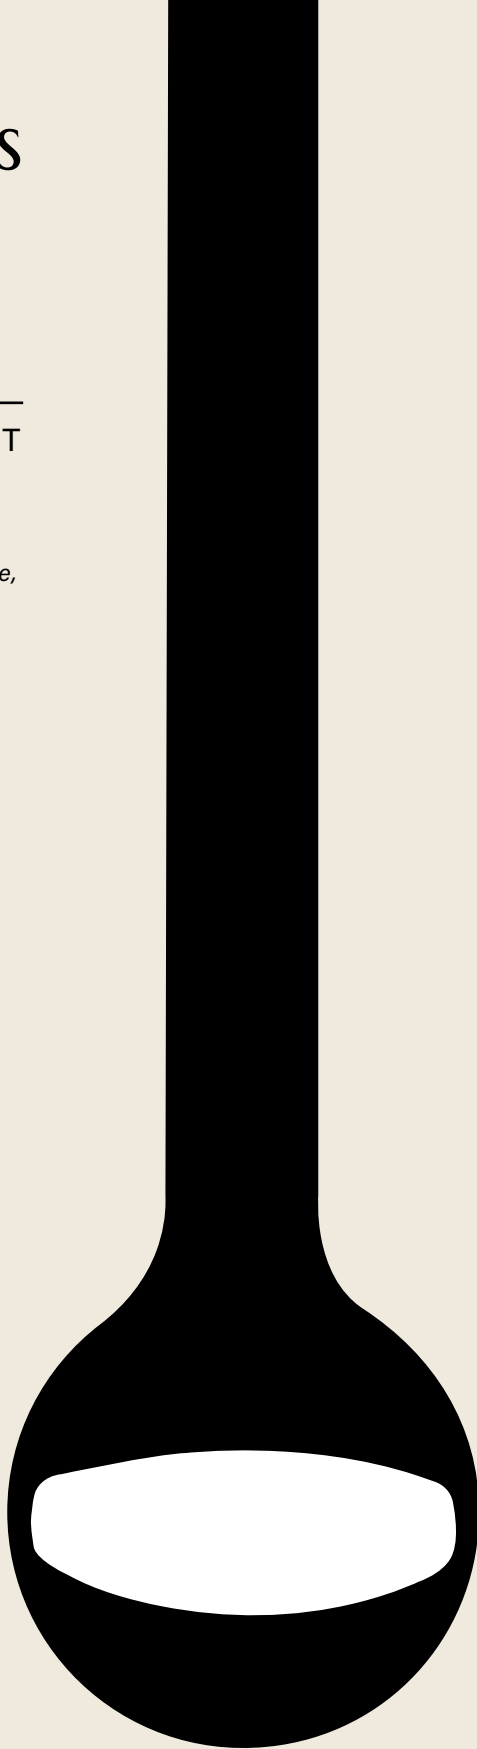

& Emifocus

1978

DESIGN: DOMINIQUE IMBERT

Taking its name from a deep-sea submersible, the spherical, suspended Bathyscafocus is evocative of underwater exploration.

Its rounded, compact design is as resolutely contemporary as ever.

CREATE BEYOND CONVENTION

Bathyscafocus

electric (Holographik®)

This model's stunningly lifelike virtual fire playing over ultra-realistic ceramic logs is made possible by a patented holographic system. The multi-sensory experience can be enhanced by the sound of a crackling fire and a choice of scents.

With flame play that can be adjusted at the touch of a button, this electric fire can be installed in virtually any context: apartments, offices and spaces that welcome the public such as hotels, restaurants or boutiques, as well as locations where wood-burning is prohibited.
