

Ergofocus

& Paxfocus

1983

DESIGN: DOMINIQUE IMBERT

The timeless design of the Ergofocus, created in 1983, earned it the honour of being exhibited at Stockholm's Museum of Modern Art.

Four decades on, it now exists in four different fuel types to suit every requirement and environment.

Its streamlined shape, ergonomic design and compact size make the Ergofocus a perfect fit for any space, multiplying the possibilities to have a suspended, pivoting fireplace in an interior.

2024 GAS

The Ergofocus is now also available in a gas version, operated by remote control. At the touch of a button, the fire can be lit, the flame intensity and heat adjusted, or a programme set for controlled, constant, comfortable heat. This model won a Gold German Design Award on its launch.
